

# Presentation Tips and Tricks: Accessibility

## VISUAL

1

Include a descriptive text under each image

2

Large text size (18-24)

3

Share a link (bit.ly or QR code) of your presentation at the beginning of your presentation

4

Use high color contrast

5

If links are present, are they underlined and bold?

6

If links are present, do they make sense out of context? (No usage of “click here” or “read more” etc.)

## AUDIO

1

When presenting, use the microphone! Even if it feels awkward or is a small group

2

All audio/visual elements should have captions
